Beirut, Lebanon

Professional Summary

Full-stack developer with experience delivering client websites and building modern web applications using React, Next.js, TypeScript, PostgreSQL, Docker, and cloud-hosted platforms. Experienced in frontend development, backend development, deployment, troubleshooting, database design, and technical architecture. Currently focused on Platform-OS, a platform foundation emphasizing repository verification, documentation, testing, maintainability, and operational reliability.

Platform-OS (Current)

Next.js · TypeScript · Turborepo · PostgreSQL · Docker · pnpm

- Maintaining and verifying a multi-package platform foundation intended to support future SaaS products and client implementations.
- Performed repository-wide verification covering dependency installation, type checking, builds, automated tests, runtime startup, and standalone artifact validation.
- Investigated and resolved repository inconsistencies through an evidence-based workflow focused on repository reality rather than assumptions.
- Contributed to architecture documentation, repository state tracking, verification reporting, and technical decision documentation through ADRs and blueprint documentation.
- Focused on maintainability, dependency consistency, validation processes, and operational reliability across the monorepo.
- Participated in evaluating architectural decisions, package organization, documentation strategy, and long-term maintainability of the platform foundation.

Professional Experience

Full-Stack Developer (Freelance) — Hospitality Venue, Beirut (2025)

- Designed, developed, and deployed a mobile-first hospitality website.
- Implemented menu presentation, reservation workflows, and contact functionality.
- Delivered the complete solution independently from planning through deployment.

Web Developer (Freelance) — ZadAgency, Beirut (2024)

- Built and deployed the agency website.
- Implemented service presentation, portfolio showcase, and contact workflows using Resend.
- Designed and developed the complete website independently.

IT & Support — DEP (Design Engineering Partner), Antelias (2018–2019)

- Developed Excel VBA automation solutions.
- Provided Windows troubleshooting, networking support, and infrastructure assistance.
- Assisted users with operational and technical support issues.

Projects

Portfolio Platform

- Built a personal portfolio platform with administrative functionality.
- Implemented hero, work, experience, blog, and contact sections.
- Developed a message dashboard backed by a Neon PostgreSQL database.
- Implemented single-admin authentication without public user registration.
- Designed and developed the complete application independently.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Vite

Backend: Node.js, Hono, tRPC, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Prisma, Drizzle ORM

Infrastructure & DevOps: Docker, Linux, Git, GitHub Actions, Vercel

Platforms & Services: Firebase, Supabase, Nhost, Stripe, Redis

Currently Learning: AWS, Cloud Architecture

Languages

Arabic — Native

English — Professional Working Proficiency

French — Reading and Writing

Education

Information Technology – Programming Track (LT)

Educational Technical Institute Dekwaneh | 2022–2023

Information Technology (TS1–TS2)

Tourism Institute Dekwaneh | 2016–2018
